

Experts Inside And Outside The Box

IPD Energy Storage Solutions offers a comprehensive portfolio of battery storage design and field support services. We combine battery system expertise with decades of engineering and construction experience to help our clients:

- Bring new products to market
- Develop sites and infrastructure
- Install, (de)commission and service equipment in the field.

Let us prove how this wing-to-wing service offering can be a differentiator for your business.

Project List

- Entergy Perryville - 6.5 MW x 6.5 MWh, GT Black Start
- Calpine Johanna - 20 MW x 80 MWh, Grid Support
- Lenox Energy Storage North - 2 MW x 8 MWh, Solar + Storage
- Lenox Energy Storage South - 3 MW x 12 MWh, Solar + Storage
- Stanton ERC - 10 MW x 4.3 MWh, Hybrid EGT
- Enmax Crossfield - 10 MW x 4.5 MWh, Hybrid EGT
- Convergent #1 - 10 MW x 40 MWh, Grid Support
- Convergent #2 - 9 MW x 36 MWh, Grid Support
- Convergent #3 - 6 MW x 24 MWh, Grid Support
- California - 10 MW x 4 MWh, Hybrid EGT
- California - 14 MW x 12 MWh, Hybrid EGT + Black Start
- United Kingdom - 13 MW x 8 MWh, Solar + Storage
- Texas - 260 MW x 260 MWh, Grid Support

Products

System design, sub-system integration, product safety and documentation, new product introduction (NPI), and launch support.

Projects

EPC, site/BOP design, system integration, and construction support for building and containerized solutions.

Services

Installation, battery loading, custom tooling, commissioning/decommissioning, and material handling services.
